

# EASY INSURANCE ACCESS

South Florida Vascular Associates makes access to care simple and stress-free.

We are an in-network provider with leading insurers, so you can focus on your health, not the paperwork.

You'll find a more complete list of accepted plans below.

If your insurance isn't listed, our team is just a call away and ready to guide you through coverage details and payment options before your appointment—no surprises, just clarity and support.

## Treatments

### Uterine Fibroid Embolization (UFE)

A minimally invasive, image-guided procedure that blocks blood flow to uterine fibroids, causing them to shrink and relieving symptoms while preserving the uterus.

### Prostate Artery Embolization (PAE)

Non surgical treatment for enlarged prostate (BPH) that reduces blood flow to the prostate, causing it to shrink and improving urinary symptoms.

### Hemorrhoids Embolization (HE)

A minimally invasive procedure that treats hemorrhoids by blocking the arteries supplying them, reducing blood flow and causing them to shrink and heal.

### Peripheral Artery Disease (PAD)

Non surgical image-guided procedure that restores blood flow in narrowed or blocked leg arteries using techniques like angioplasty and stenting, relieving pain and improving mobility.

### Genicular Artery Embolization (GAE)

Non surgical procedure that treats knee pain by reducing blood flow of genicular arteries.

### Varicose Veins Treatment

Minimally invasive procedure that close or remove damaged veins to improve circulation and relieve symptoms like pain and swelling.

### Varicocele Treatment

Non surgical embolization procedure that blocks enlarged veins in the scrotum, redirecting blood flow to relieve pain and improve function.
